

Exam Review Form

Exam Review

After an exam, it is important to review the material to understand where you are in the course and strengthen your knowledge of the course content. This test autopsy form will allow you to examine the issues you faced during the exam, identify methods or approaches that were beneficial, and better prepare for upcoming exams or assignments. Students that reflect and learn from their test-taking experiences are more likely to make targeted adjustments to their test-taking strategies that will help them improve in the course.

Instructions

Go through your exam and identify the questions you answered incorrectly. Then, to the best of your ability, fill out the chart below. Once this is complete you can create an action plan to address the issues you faced. For unfamiliar material, you may want to go back and review your course notes and lectures, visit your instructor or course TA during office hours, or seek help from a tutor in the [SPS Tutoring Program](#).

Question Number	Points Lost	Question Type	Reason(s) For Missing the Question				
			Carelessness	Unfamiliar with the Material	Misread or Misunderstood the Question	Ran out of Time	Other?
